

HOW A COMPUTING UNIT SHOULD LOOK...

Components from each lesson in a unit come together to create a composite e.g. a completed application or document. The components for each computing unit will differ based on whether the unit is practical or e-safety based.

During the unit the explore and practise stages will be intertwined to ensure skills and knowledge is embedded.

Prior learn
Include vocabulary and objectives from previous year to gain start point for learning.

Explore
Teach the components and explore them within isolation.

Practise skills
Ch to practise the components being taught.

Create/apply
Ch to apply the components they have learnt to create a composite

Evaluate
Ch to showcase their composite work and evaluate it against the learning objectives for the unit.
