

HOW A COMPUTING LESSON SHOULD LOOK...

Individual component lessons throughout the unit are applied to create the composite final piece.

(1) Prior learning – retrieve and recall from previous lesson to improve automaticity. (Recall) Make connection to schema

(2) Share LO, new vocabulary and context of the lesson

(5) Evaluate.
Review and Reflect

(3) Teach/Model
the components of
the lesson

(4) Active Learning
and application of
the component

Constant live
feedback and
questioning
throughout the
lesson (AFL)
